Embedding Dashboard to web application:

[illegible]

The screenshot shows the IBM Cognos Analytics web interface. A 'Share' dialog box is open in the foreground, centered on the screen. The dialog has a title bar with a close button (X) and three tabs: 'Send', 'Link', and 'Export'. The 'Link' tab is selected and highlighted with a blue underline. Below the tabs, there are three sections:

- Send:** This section is currently empty.
- Link:** This section contains a text area with a URL: `https://us1.ca.analytics.ibm.com/bi/?perspective=story&uid=i4A67CFB043AF4E285F1AAD8BCF089A6&objRef=i4A67CFB043AF4E285F1AAD8BCF089A6&options%5Bds...`. To the right of the text area is a copy icon.
- Embed code:** This section includes a 'Width:' field set to '320' and a 'Height:' field set to '200'. Below these fields is a text area containing an iframe code snippet. To the right of the code area is a copy icon, and a 'Copied' tooltip is visible over it.

The background interface shows the IBM Cognos Analytics dashboard with various tabs like 'Analytics', 'Filters', 'Fields', and 'Properties'. The main content area displays a chart and some text, including 'Data on this story is provided by IBM Db2.'.
